## Professional Summary

Computer Engineering undergraduate focused on practical AI development, machine learning, computer vision, and locally hosted language-model applications. Builds Python-based projects using Scikit-learn, OpenCV, YOLO, and Ollama. Seeking AI/ML internship or junior opportunities where I can contribute to applied projects while continuing to develop strong engineering skills.

## Experience

**AI Engineer — Nassir | Oct 2025 – Mar 2026**

- **Worked on an AI-based application for English learning using locally hosted language-model and voice workflows.**
- **Project scope included an IELTS writing-assessment feature.**

## Projects

**AI Chatbot with Text & Voice Interaction** github

- *Python · LLM integration · Speech workflow*
- Built a Python chatbot concept for natural-language interaction through text and voice, with speech-to-text / text-to-speech workflow and context-aware responses.

**YOLO Object Detector** github

*Python · YOLO · OpenCV*

- Implemented real-time object detection with offline inference support for webcam, image, and video inputs.

**Text Detection from Camera Images** github

*Python · Computer Vision*

- Developed a computer-vision project focused on detecting text in images captured from a camera.

**Background Removal** github

Python · OpenCV · Image Processing

- Built an offline image-background detection and removal project using OpenCV, with local CPU/GPU execution described in the repository.

**Document Recognition** github

Python · Computer Vision

- Created a document-detection project for identifying documents in images or camera input.

## Education

**B.Sc. in Computer Engineering (in progress)** — Islamic Azad University, Karaj, Iran | 2024 – Present

**Diploma – Experimental Sciences** — Ministry of Education, Iran | 2023 – 2024

**Diploma – Mathematics and Physics** — Ministry of Education, Iran | 2020 – 2023

## Technical Skills

| | |
|---|---|
| Data analysis | NumPy, Pandas, Matplotlib |
| Programming | Python |
| Machine learning | Scikit-learn; supervised classification and model evaluation practice |
| Computer vision | OpenCV, YOLO-based object detection, image and document detection |
| LLM applications | Ollama, locally hosted language models, text/voice chatbot workflows |
| Additional exposure | PyTorch, FastAPI |

## Languages

English: Intermediate (self-assessed) Persian (Native)
